PREVENTING POTENTIAL COLOR WASH-OFF FROM DYED MULCHES

To: Our Valued Customers
From: The Team at Zeager Bros., Inc.

Thank you for purchasing color enhanced mulch from Zeager Brothers, Inc.! We would like to ensure your satisfaction with your purchase. Therefore, we would like to point out a potential problem.

It is possible to experience colorant washing from the colored mulch if it rains during the first 24-48 hours after installation, especially during periods of heavy rain.

As with any other item that is being painted, the paint must have ample time to dry before it is no longer vulnerable to color wash-off during a rainstorm. Please consider this fact and do not install if there is not enough time for the material dry completely before the rain begins.

We know this may be an inconvenience to your installation plans, but it is vital to your overall product satisfaction.

If it happens to rain before your mulch is completely dry, try raking the mulch to bring up mulch from underneath that may not have been exposed to the direct rain.

If you have any further questions, please ask! We are happy to help in any way we can!

We appreciate your business very much! Thank-you!
