WOODCARPET.COM

ZEAGER JOB SPEC 27

APPLICATION: WALKWAYS AND PATHWAYS - used to provide a clean and resilient trail.

PRODUCT FUNCTIONS:

1. WoodCarpet Equine footing that when installed and maintained properly, provides a consistent, resilient and stable surface.
2. Geotextile Fabric used as a barrier to keep the subsoil and gravel from mixing together.

RECOMMENDED INSTALLATION PROCEDURE:

1. Excavate as necessary. Compact the subsoil.
2. Install a layer of approved geotextile fabric, overlap seam 10 in.
3. Spread 1/4 in. minus fines to a depth of 3 in., wet down and pack using a roller or tamper.
4. Spread WoodCarpet Equine Footing to a depth of 6 in. compacted.

MISCELLANEOUS INFORMATION

1. A consistent balance of moisture is important. Drainage is necessary to remove excess moisture. The proper amount of moisture will cause WoodCarpet Equine Footing to knit together and compact. If WoodCarpet Equine Footing becomes too dry, wet it down, drag it and mechanically compact it.
